# WELCOME TO ISSUE 15 OF YOUR IBSTOCK BRICK SELECTOR

The **Ibstock Brick Selector** is your **comprehensive guide** to the **UK's largest brick range**

For this issue we have kept all of the **best bits** that we know **really work, including:**

- Close up shots of each of our bricks to demonstrate the texture of the product
- Now including Specials Shapes - how these products can be used to get those detailed bits of brickwork perfect
- A NEW GUIDE to brick matching, helping you to choose the correct product for your project
- Our handy Get it Right section, with helpful reminders about how to get those most important tasks right

Just visit [www.ibstockbrick.co.uk](http://www.ibstockbrick.co.uk) or call the Sample & Literature Hotline on **0844 800 4578** to request one and we will send it straight to you.

# HOW TO CHOOSE THE RIGHT BRICK FOR YOU

We have arranged our bricks throughout this brick selector in order of colour, type of manufacture and texture. Where bricks are available in different sizes we have indicated this by a simple table. Whilst the colour of a brick is easy to see, look closely at the brick you are matching to establish the type and texture.

## COLOURS

There are **eight basic body colours** to choose from. We then add variations of darker and lighter shades to create a wider choice. N.B. bricks are made from natural materials so colours will vary slightly from batch to batch.

RED

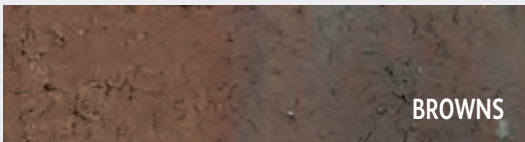

RED MULTI

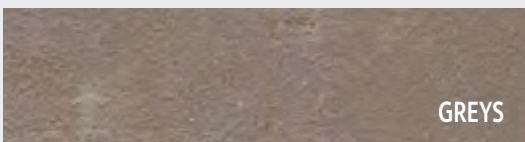

BUFF

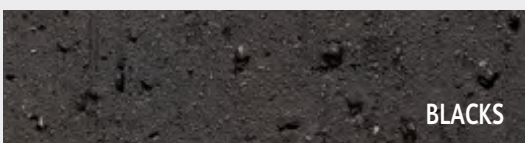

BUFF MULTI

BROWNS

GREYS

BLACKS

BLUES

## BRICK TYPES

WIRECUT

Defined edges are formed within the manufacturing process although a softer edge can be achieved by rumbling. Perforations through the body of the brick are an easy way of identifying if the brick is a wirecut. They can also be a solid brick.

WATERSTRUCK

Often a solid brick, although a few products are made frogged. Commonly a lip is evident at the bottom of the face.

## SIZES

Bricks are made in a number of sizes, the **standard being 215mm x 102mm x 65mm**. Matching the height to existing brickwork creates a more continuous appearance. A selection of products are also available in **50mm, 68mm and 73mm**. We have indicated which of our bricks come in alternative sizes throughout the brochure using the symbols shown above.

## TEXTURES

Bricks are available in several textures. Identifying the texture of the brickwork you are matching to will help to narrow down your choices.

Commonly has soft edges, always a frogged body. (Indent in the top of the brick).

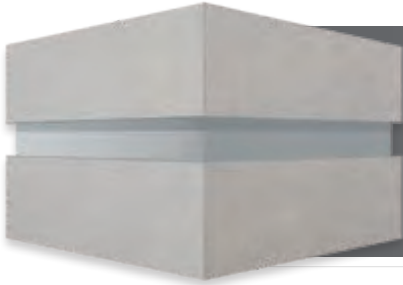

Commonly has soft edges, often a frogged body. (Indent in the top of the brick).

# COMMONLY USED JOINT PROFILES

One of the factors that influence the long term performance of brickwork is the correct mortar joint profile for efficient shedding of rainwater.

This can produce interesting shadow forming joints, but weather resistance and strength will be less than with other joints. Use only with frost resistant bricks in sheltered exposure conditions. The recess should not exceed 3-4mm and is not recommended with full fill cavity insulation.

## SQUARE RECESSED

This joint gives an improved appearance over a flush joint, with little reduction in its strength. The tooling of the mortar joint pushes it against the bricks compressing the surface of the mortar minimising any potential small air pockets, makes the surface of the mortar denser and more able to resist the ingress of wind driven rainwater. Subsequently this profile is suitable for all exposure zones.

## BUCKET HANDLE

This produces a contrasting effect of light and shade on the brickwork. Such joints, when correctly formed, have excellent strength and weather resistance and are suitable for all grades of exposure.

## WEATHER STRUCK

This gives maximum bearing area and is often favoured when coarse textured bricks are used. With some brick types the finish may appear a little irregular. Suitable for moderate and sheltered exposures as the mortar joint has not been compressed by finishing tool.

## FLUSH

## MORTAR COLOURS

Consideration should be given to mortar colour, as this will influence the appearance of the completed brickwork.

The mortar colour will help new brickwork blend in to existing brickwork, as the colour of the bricks can appear to change depending upon mortar colour.

The bricks shown left are all the same colour, only the mortar colour is different. Check out the Ibstock mortar selector at [www.ibstockbrick.co.uk](http://www.ibstockbrick.co.uk)

# BRICKWORK BONDING PATTERNS

Bonding in brickwork refers to the pattern in which they are laid. They usually overlap between courses in order to distribute load and provide stability. Bonding can also be used for decorative purposes.

**STRETCHER BOND**

**ENGLISH BOND**

**HEADER BOND**

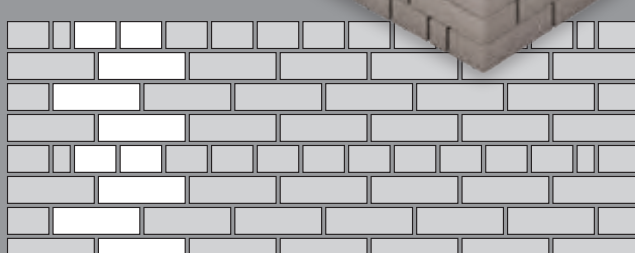

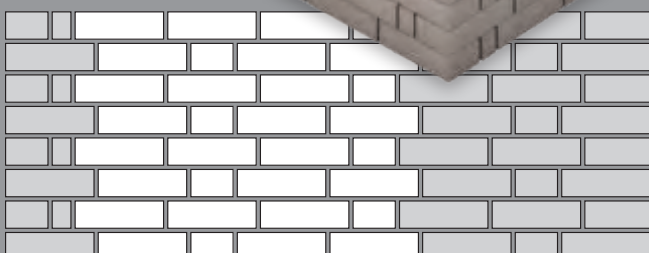

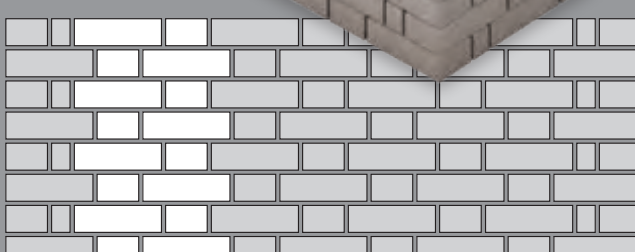

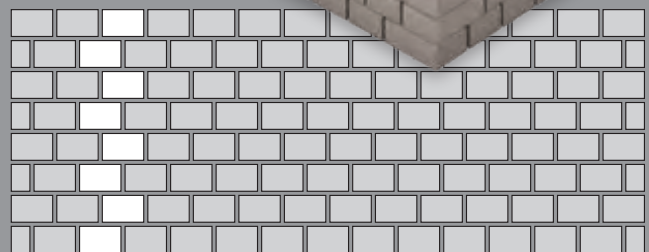

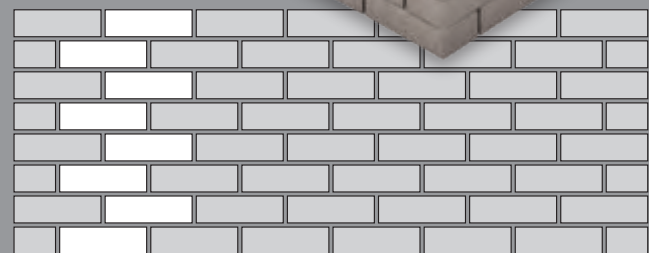

**FLEMISH BOND**

**FLEMISH GARDEN WALL**

**ENGLISH GARDEN WALL**

# GOOD PRACTICE & SAFE STORAGE FOR YOUR IBSTOCK BRICKS

The essential guide to good site practices with hints on what to avoid to help you create that great finish.

## BRICK STORAGE AND PROTECTION

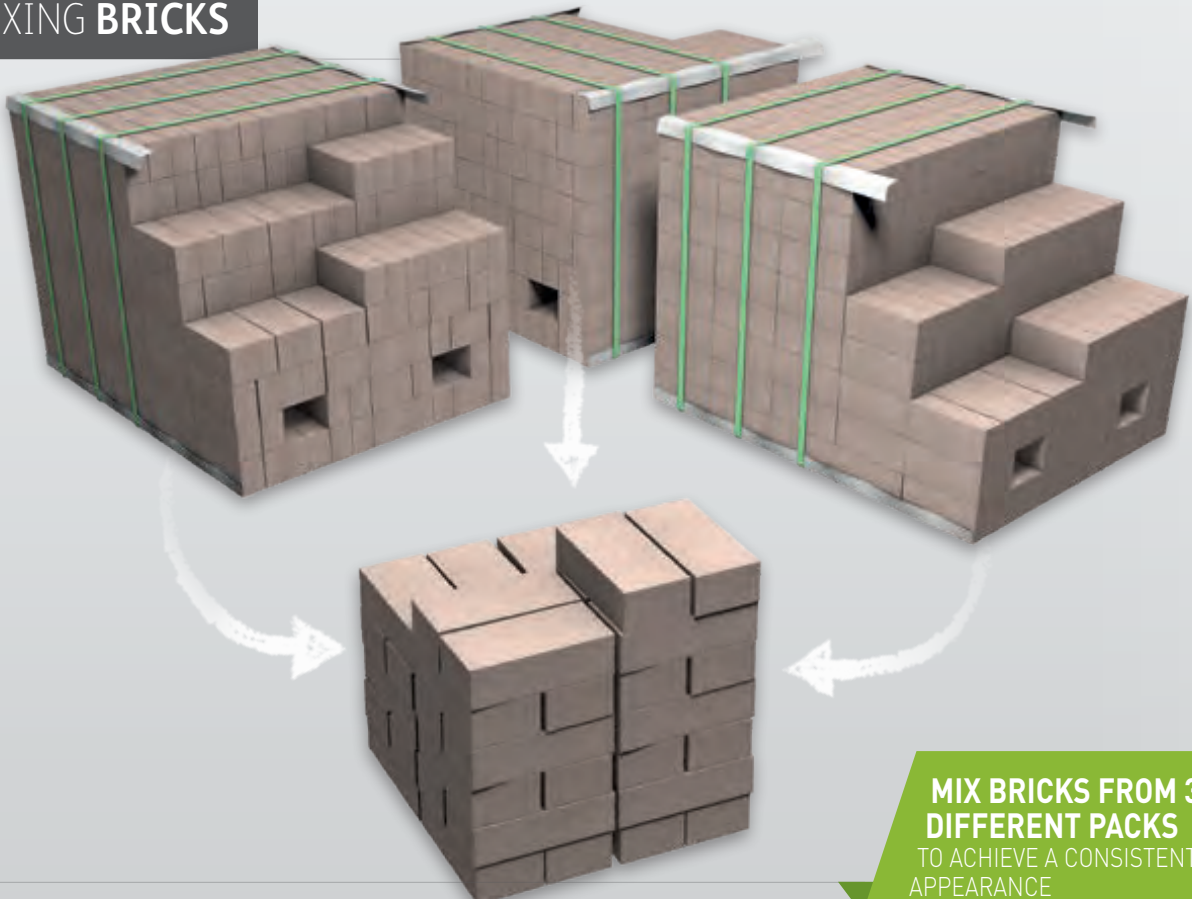

Bricks should be inspected on delivery. They should be unloaded directly onto a hard standing that is:

- Firm
- Level
- Well drained
- Puddle free

**ALWAYS COVER OPEN PACKS**

## MIXING BRICKS

**MIX BRICKS FROM 3 DIFFERENT PACKS**  
TO ACHIEVE A CONSISTENT APPEARANCE

## PROTECTION OF NEWLY BUILT BRICKWORK

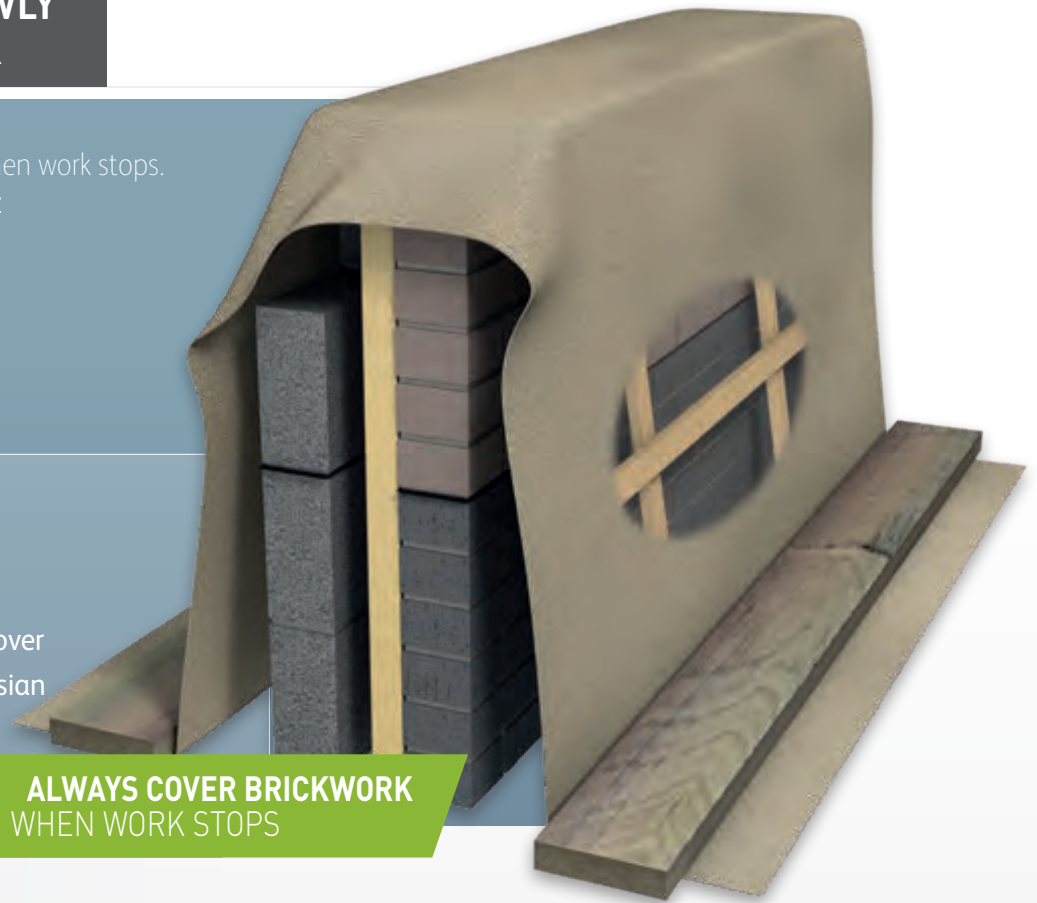

All walls must be covered when work stops. Rain on new work can cause:

- Colour change of mortar
- Lime stains
- Saturation
- Efflorescence

### REMEMBER

- Cover your brickwork!
- In rain, snow and frost use a water resistant cover
- In dry weather, use hessian or a similar product

**ALWAYS COVER BRICKWORK  
WHEN WORK STOPS**

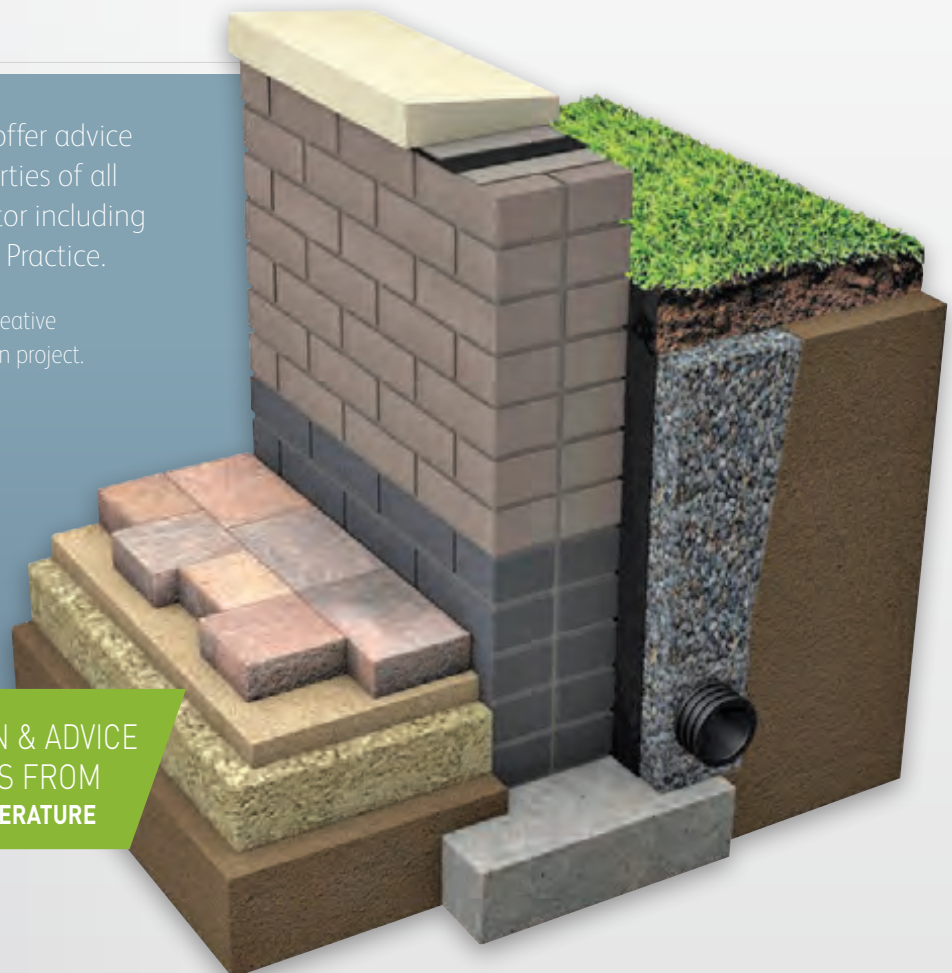

## DESIGN ADVICE

Our design & technical teams offer advice on the performance and properties of all products within the Brick Selector including British Standards and Codes of Practice.

Our team of Design Advisors can offer creative and cost-effective solutions to any design project.

Quality assured to ISO 9001, they can offer practical advice on a diverse range of issues including movement joints, brick and mortar specification through to architectural details involving special shapes.

# STOCK BRICK PAVERS

At Ibstock Brick, we specialise in stock brick pavers. Their softer appearance and warm natural clay colours make them perfect for domestic settings, such as driveways, paths and patios.

LAYBROOK FLAME RED STOCK PAVER 0773  
PRIVATE HOUSE

CLAY PAVERS ARE  
EASY TO INSTALL

## CLAY PAVERS HAVE MANY BENEFITS OVER CONCRETE ALTERNATIVE

The colours are formed throughout the paver as a result of firing natural clays at around 1000°C. Typically, concrete pavers use surface colours and tints which often wear, fade and chip to reveal the grey aggregates and substrate beneath. In addition, the effects of water and sunlight on the surface of our clay pavers actually enhances their appearance and helps maintain a clean surface.

This is due to the ceramic nature of the surface and it is this property that ensures clay pavers have excellent resistance to staining or erosion from weak alkalis and acids such as detergents used in car washing and acid rain. Prolonged exposure can cause concrete alternatives to fade.

## CHOOSE CLAY PAVERS

They are simple to cut and have five possible decorative wear faces, unlike concrete, which has just one! This means that edges, corners, kerbs and steps can all be formed from the paver you choose without the need or cost of specially shaped units.

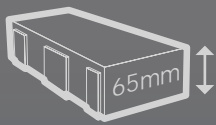

Laybrook Flame Red Stock Paver

Laybrook 0773

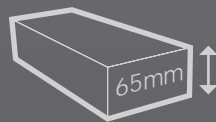

## LAYING OPTIONS

WE OFFER TWO PAVING OPTIONS;

### SUSTAINABLE DRAINAGE SYSTEM (SUDS)

pavers are laid on a suitable permeable aggregate sub-base. They measure 200mm (length) x 100mm (width) x 65mm (height) including the width of the spacers.

### FLEXIBLE PAVERS

are bedded on sand. These measure 200mm (length) x 100mm (width) x 65mm (height).

## FLEXIBLE PAVING

Laybrook Red Multi Stock Paver

Laybrook 0727

LAYBROOK FLAME RED STOCK PAVER SUDS MN0773A

**TOP TIP**

THE UNIQUE TAPERED PROFILE JOINTS MAKE WALKING ON OUR SUDS PAVER EASY.

## SUSTAINABLE DRAINAGE SYSTEMS (SUDS)

Since October 2008, the use of SUDS surface finishes is a legal requirement for many driveways joining the public highway. Therefore, any new surface should incorporate a water permeable layer to minimise excess run-off during heavy rain. To fit impermeable surfaces, above a certain area, requires the submission of a planning application, a fee and associated delays.

LAYBROOK FLAME RED STOCK SUDS PAVER MN0773A

**TOP TIP**

THE UNIQUE CONCEALED SPACERS ALLOW THE PAVERS TO BE LAID IN MANY DECORATIVE PATTERNS WITHOUT UNSIGHTLY GAPS.

We have introduced the only clay stock brick pavers that are **SUDS compliant** and that can also be used for water harvesting systems.

This means that you can **enjoy the lasting beauty** of clay pavers anywhere around your home.

THE PAVERS **MUST BE** BEDDED ON AN APPROPRIATE PERMEABLE PAVEMENT AGGREGATE SUB-BASE.  
**YOUR INSTALLER WILL BE ABLE TO ADVISE YOU.**

## SPECIALIST BLENDING FACTORIES

These 5 factories have a rich history in producing beautiful brick blends – but with another 14 manufacturing sites and more than 300 brick types in our range, the possibilities really are endless.

SWANAGE

TRADITIONAL AND BESPOKE STOCK BRICKS

Beautiful individually crafted stock bricks available in unique colours, textures and sizes. All products are complemented with a full range of handmade special shapes.

BIRTLEY

MAKING BEAUTIFUL BRICKS FOR OVER A CENTURY

Authentic waterstruck bricks manufactured for over 100 years. Birtley couples traditional production with the latest firing technology creating an extensive and varied range of colours.

# TRADESMAN<sup>®</sup> RANGE

IBSTOCK<sup>®</sup> TRADESMAN<sup>®</sup>

*More than a match for the originals*

From the 1930s onwards many houses were built using bricks made from distinctive lower Oxfordshire clays. Our Tradesman<sup>®</sup> range has been meticulously designed to blend in with these bricks wherever they are used.

Tradesman's superior durability and strength means they are ideal for use in most locations, such as boundary walls and wall cappings or to match existing brickwork for extensions and other refurbishments.

They are also popular with builders because of their excellent colour consistency and are also easy to lay with minimal wastage.

# Ibstock Kevington

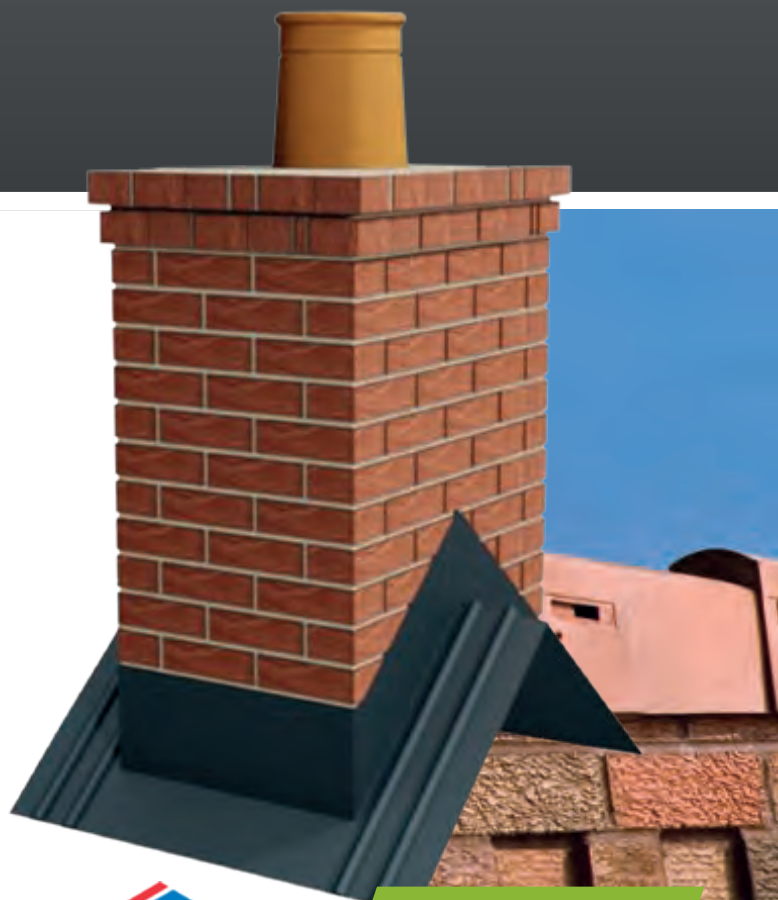

## FASTSTACK® CHIMNEYS

Our chimneys can be used with most appliances including class 1 multi-fuel stoves

TIME SAVING  
CHIMNEY BUILDING  
IN **7** EASY STEPS

- ✓ 1 - Delivered ready for pointing
- ✓ 2 - Crane into position
- ✓ 3 - Screw to trusses
- ✓ 4 - Batten over support plate & tile roof
- ✓ 5 - Apply sealant
- ✓ 6 - Lead dressed securely
- ✓ 7 - JOB DONE!

**LIGHTWEIGHT  
GRP BRICK EFFECT**  
VERSIONS NOW  
ALSO AVAILABLE

**ALL OUR CHIMNEYS  
CAN BE MADE USING  
ANY BRICK OR STONE**

### MONO PITCH

Mono Pitch chimneys are for use on the pitch (slope) of the roof.

### GABLE END RIDGES

The Gable End Ridge chimneys are designed to allow the brickwork to continue from the gable wall into the chimney unit.

### MID RIDGE

In situations where the chimneys are not located directly over the gable wall, the Mid Ridge design can be used.

Ibstock Kevington is the UK's leading manufacturer of special shape bricks, arches, prefabricated chimneys and building components. Our in house design and sales teams offer unrivalled expertise and experience. Take a look at some of the fantastic products on offer...

### ALL BRICKWORK COMPONENTS

CAN BE MANUFACTURED IN ANY BRICK OR STONE

## DENTILS & SOLDIERS

Use bricks in an imaginative way

### BRICK TYPES

#### DENTILS

Dentilation is a tooth-like effect created by the projection of alternate headers or cut bricks, usually seen at eaves level or as a string course. In today's brick aesthetics, dentil courses offer a decorative opportunity which deserves wider use. It's easy to design a dentil detail with Brickwork Component units.

#### SOLDIER COURSES

Soldier Courses are produced by laying the bricks on end, side by side. Traditionally this style of brickwork is used both above and below openings. Easily designed using Brickwork Component units, a soldier can also be used to create a horizontal band course around a building.

Ask your stockist for more information or call our Sales Office on **0844 736 0350**

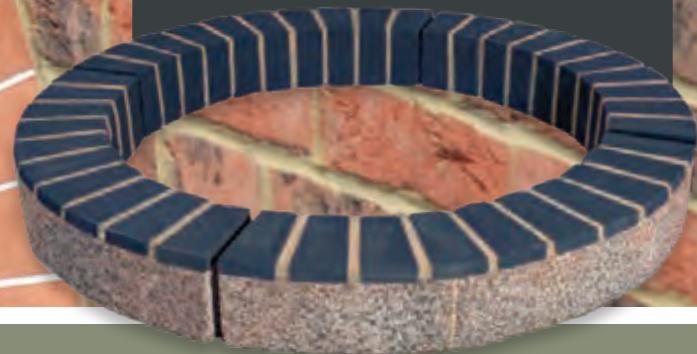

# Ibstock Kevington

## ARCHES & BULLSEYES

Brickwork details made easy - design flexibility, quick to install, consistent quality, time-saving and can be lightweight.

Our arches and bullseyes are popular with small builders as well as large developers. Arches are often thought of as changing a building into a home as they add character by creating a point of interest and give that extra kerb appeal. Whether your arch is over a window, door, garage door or a walkway, our arches can span the distance.

## SWIFT & BAT BOXES

Friendly habitats for  
bats and swifts.

### ENCLOSED SWIFT BOX

Swifts come to the UK for just a few months each summer from Central and Southern Africa. Despite legal protection their numbers are declining. Since Roman times they have been at home in traditional man-made buildings. However they find it increasingly difficult to find nest sites in modern or refurbished buildings due to the effective sealing of the eaves.

- Developed for Swifts
- Locate near eaves
- Ideal for both new-build & conservation work
- Available in Smooth Red or Smooth Blue finishes

Ask your stockist for more information or call our Sales Office on **0844 736 0350**

## Ibstock Kevington understands the need to create exciting kerbside appeal.

Fitting our Brickwork Components is easy. They are quick to install and cost effective. Whatever your brick type, we can create your component; from our popular arch and bullseyes, sills, chimneys and dentil work to more decorative soldier courses, quoins, basketweave and herringbone panels.

# FEATURE HEADERS

Maintaining a tradition.

Glazed or burnt headers were often an accidental phenomenon of traditional kilns. The distinctive patterning formed by the headers is often seen in many solid walled buildings.

We have carefully recreated the authentic appearance for use with modern cavity wall construction. These are available in three ranges; traditionally glazed, kiln burnt naturally fired bricks and hand tinted bricks.

### HAND TINTED RANGE

Anthracite Blue/Grey FHTH55

Charcoal Black FHTH65

Ash Grey FHTH35

### TRADITIONAL GLAZED

### KILN BURNT RANGE

Parham Red Stock Glazed Header FH0708

Available in 65mm format only.

Swanage Handmade Light Red Glazed Header FH4302

Available in 65mm format only.

Tonbridge Handmade Grey Brown Header FH4041

Available in 65mm format, and 50mm to special order.

Bevern Dark Multi Stock Header FH4520

Available in 65mm format only.

Holbrook Sandfaced Dark Header FH4120

Available in 65mm format only.

### ENCLOSED BAT BOX (B & C)

In the UK there are 17 species of bats, all of which are protected by law. Our range of bat boxes helps to encourage safe habitats for these remarkable mammals, allowing them to live in harmony with people.

- Designed specifically for the pipistrelle bat
- Several roosting zones are created inside the box
- Bats are contained within the bat box itself
- Maintenance free with entrance at the base
- Ideal for new build & conservation work
- Attractive motif (option C only)
- Available in all brick types to match brickwork

BAT BOX B

BAT BOX C

## Ibstock Brick's Commitment To Quality

### IBSTOCK REGISTERED FIRMS

The first Quality Assurance Scheme in the industry, operating in accordance with BS EN ISO 9001 to be awarded Registered Firm Status for the design and the manufacture of bricks, pavers and special shapes.

## Ibstock Brick's Commitment to the Environment

In being the first UK brick manufacturer to achieve ISO 14001, the internationally recognised standard for all production sites and fully embracing the Government's strategy for sustainability, Ibstock Brick leads the way in demonstrating environmental responsibility. Ibstock Brick's commitment to responsible sourcing is demonstrated through their accreditation to BES 6001.

Although the instructions contained in this publication and any other information published by Ibstock are believed to be accurate at the date of publication, they are strictly for guidance only and [the Company] accepts no liability in relation to their use or for any losses, howsoever caused. You are responsible for taking all reasonable steps to ensure your use of the goods/products conforms to all applicable health and safety requirements from time to time. If in doubt, please consult appropriately qualified persons. All products sold by Ibstock Brick are sold subject to Ibstock Brick's Terms and Conditions of Sale, a copy of which is available on request.

The product photographs represent as accurately as possible, within the limitations of photography and printing, the colour of a representative sample of this range of products. However Ibstock does not warrant that all bricks produced in this range will match exactly the colours reproduced in this brochure.
